# APOIO AO SERVIÇO DOCENTE

DISSERTATIONS MADE SIMPLE

Tiago Albuquerque - 112901

José Marques - 114321

José Mendes - 114429

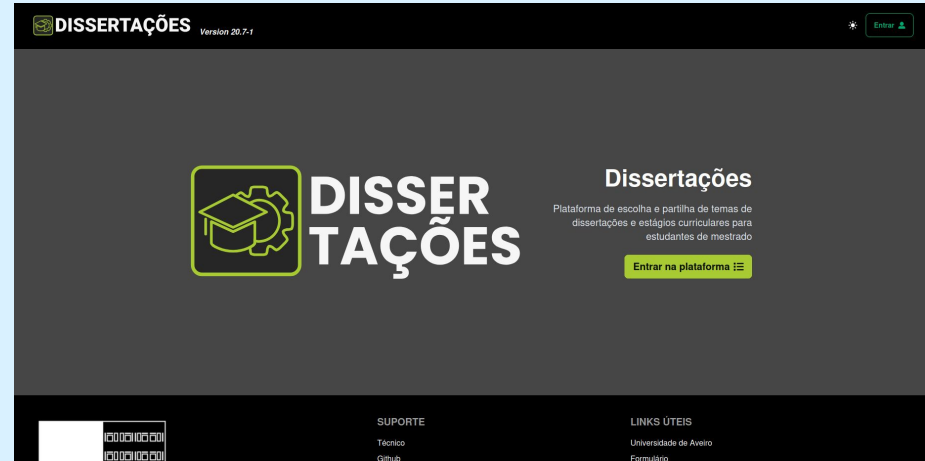

Abel Teixeira - 113655

Tiago Lopes - 113586

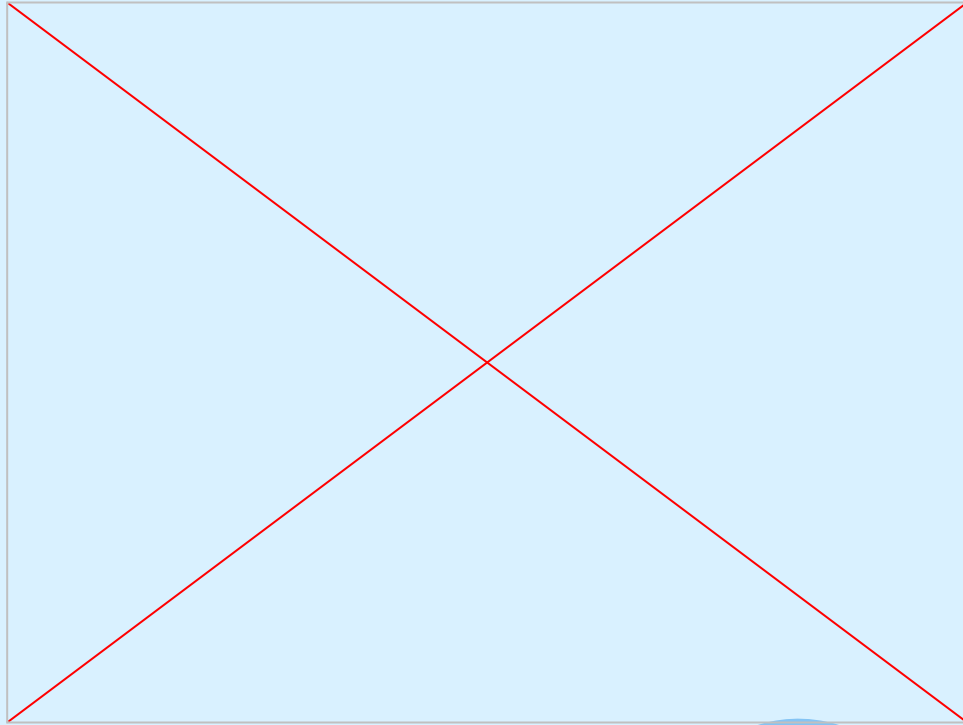

# PROJECT CONTEXT

Our project is based on the continued development of an application that can be used by the university's MSc students to select the topics for their dissertations, projects and internships. It will also be used by supervising professors, who will be able to view the dissertations internships and projects they oversee and assign them to students.

Current platform available at:  
[dissertacoes.av.it.pt](https://dissertacoes.av.it.pt)

# DEMO

# FRONTEND CHANGELOG

- Page for staff to see what dissertations have documents that need to be validated;
- Page for students to submit their documents;
- Page for staff to validate the documents submitted by the students;
- Workflow between the student and the staff;

# BACKEND CHANGELOG

- Dissertations status;
- API endpoint to check if user is staff;
- API endpoints for documents' submissions by students;
- API endpoints for documents' validations by staff;
- Search bar refactoring.

# GOALS REVIEW

- Submit documents;
- Auto fill the documents;
- Validate and reject the documents;
- Mark the date of the defense;
- Advanced search.

# GOALS REVIEW

- **Submit documents;**
- Auto fill the documents;
- **Validate and reject the documents;**
- Mark the date of the defense;
- **Advanced search.**

# FUTURE WORK

## Front-end:

- Creation of a calendar page;
- Add a different validation page for internships;
- UI improvements.

## Back-end:

- Creation of endpoints for calendar;
- Creation of endpoints for documents of internships;
- Improve security in the application.

# THANKS!
